**NOTICE OF EX PARTE COMMUNICATION
OF THE CALIFORNIA COGENERATION COUNCIL**

Pursuant to Rule 8.3 of the Rules of Practice and Procedure of the California Public Utilities Commission (the "Commission"), the California Cogeneration Council ("CCC") submits this Notice of *Ex Parte* Communication.

On September 17, 2007 at approximately 5:00 p.m., representatives of the CCC discussed, on a conference call, the Alternate Proposed Decision ("Alternate PD") with Andrew Schwartz, advisor to President Peevey. The CCC Representatives on the call were Beth Vaughan, Executive Director of the CCC, R. Thomas Beach, consultant to the CCC, David Hermanson, a member of the CCC employed by Primary Energy, and Jerry R. Bloom and Joseph M. Karp of Winston & Strawn, LLP, counsel for the CCC.

On the call, the CCC representatives explained their position on the Alternate PD in the above-captioned proceedings. The CCC representatives stated that the Alternate PD is, in many respects, a significant improvement over the original Administrative Law Judge's Proposed Decision ("PD"). The CCC representatives stated the Alternate PD still places too much weight on the NP-15 and SP-15 spot market prices and proposed they account for no more than one third of the SRAC formula, with the existing administrative values making up the difference. The CCC representatives explained why the Southern California Edison Company's ("SCE") administrative heat rate should be set at 9,705 Btu/kWh and that the record on the proceedings supports this value as reasonable. The CCC representatives proposed that the Commission

require the utilities to employ, on an interim basis, the updated time of use ("TOU") factors adopted by the Commission for energy efficiency and demand response programs, and revisit these interim TOU factors in the technical workshop that the Alternate PD requires 60 days after the Commission's decision. The CCC representatives also explained that PG&E City-gate prices are much better indicators of gas prices actually being paid by electricity generators and should be used in PG&E'S new SRAC formula rather than the arbitrary 50/50 mix of Malin and Topock gas. The CCC representatives stated the 2007 MPR should serve as the basis for the combined cycle gas turbine fixed costs of the firm capacity price calculation. The CCC representatives said that the Commission should increase the as-available capacity price to reflect a realistic capital cost for the combustion turbine proxy. Finally, the CCC representatives stated that the Commission should base the NP-15/SP-15 based heat rate component on a rolling average of 12 months of forward prices.

Respectfully submitted,

Joseph M. Karp
